DETAILED ACTION

Allowable Subject Matter

1. This communication is in response to the amendment filed 2/20/2004.
2. Claims 56-89 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The claimed invention pertain to a method and system for investing in Brownfields-related projects that are capable of supporting all aspects of a Brownfields remediation, development, redevelopment project, while shielding investors from environmental liability. In this invention an investor's risk of incurring environmental liability is substantially reduced by providing that the Brownfields fund is completely passive with respect to the Brownfields project, taking no security or mortgage interest in the Brownfields.

The searches made by the Examiner on the patents databases of the USPTO, European Patent Office, Japanese Patent Office and World Intellectual Property Organization (WIPO) do not show any patent on private investors investing in Brownfields-related projects. The following list identifies the most relevant prior art pertinent to the claimed inventions:

Wolfberg et al. (US Patent No. 5,214,579) teaches a processing system which manages, monitors and reports the growth of a participant's investment base with respect to progress towards achieving a predetermined target amount selected by the participant. Wolfberg fails to teach using the Brownfields fund which providing investment capital on a non-recourse basis for Brownfields projects and remaining passive with respect to the Brownfields projects.

Luskin et al., (US Patent No. 5,812,987) teaches a method and system for managing assets in one or more investment funds over a specific time, wherein a fund comprises a plurality

Art Unit: 3628

of assets(e.g., stocks, bonds, currencies, gold, silver, oil, gas), and wherein the time horizon represents the expected date at which cash will be withdrawn from the fund is associated with each fund. Luskin does not teach using the Brownfields fund which providing investment capital on a non-recourse basis for Brownfields projects and remaining passive with respect to the Brownfields projects.

Furthermore, Examiner searched Non-Patent Literature, including the following databases: Business Wire, Business Week, PR Newswire, Gale Group (all), McGraw-Hill Publications, World Report 1997-2000, Financial Times, New York Times, Wall Street Journal, Software Reviews Companies and Products, Microcomputer Software Guide, Conference and Papers Index 1973-2000, Dissertation Abstracts Online 1861-2000, INSPEC (IEEE), Inside Conferences, Internet and Personal Computer Abstracts, Wilson Appl. Sci. And Tech. Abstracts, Derwent WIPX, American Banker Publications, Banking Information Source, Bond Buyer Full Text, and Finance & Banking Newsletter, and the most relevant documents regarding this invention are listed on the attached Notice of References Cited ((Form PTO-892).

Thus, the Examiner considers the novelty of the invention to be an investment vehicle which allows private investors to participate in Brownfields-related projects.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
